5. Catfishes, Case Study for General Discussions of Phylogenetic and Macroevolutionary Topics

5.1 Primary Homologies, Secondary Homologies, and a Priori Versus a Posteriori Explanations in Evolutionary Biology 389

5.2 Homoplasies, Consistency Index, and Complexity of Macroevolution 396

5.3 Functional Uncouplings and Morphological Macroevolution 400

5.4 Myological Versus Osteological Characters in Phylogenetic Reconstructions 403

5.5 Analysis of Distinct Anatomical Regions in Phylogenetic Reconstructions and the Coding of Multistate Characters 417

5.6 Aptations, Exaptations and Adaptations in Macroevolutionary Studies 429

5.7 Parallelisms, Convergences and Constraints in Macroevolution 434

5.8 Cordelia's Dilemma, Historical Bias, and General Evolutionary Trends 442

5.9 Punctuated Equilibrium, Speciation, Living Fossils and Macroevolution 451
